

Committee on Screening, Brief Intervention and Referrals (SBIR)
Lancaster County Substance Abuse Action Coalition (SAAC)
May 4, 2004

Present were: Bob Osborne, Karen McCain, & Otto Schultz
Joe Rogers & Topher Hansen were out of town and Karee Ficke had a schedule conflict

Next Meeting is June 1, 3:30 at CenterPointe.

The first presentation with 14 Family Practice Residents and 2 or 3 faculty was a success in that it was well received, showed significant positive movement on pre- and post-tests, and resulted in one referral almost immediately.

Bob will talk to Les Vskrna re: follow-up activities. One class graduates in June and a new group comes in July. We should also schedule a follow-up training with a post-post-test 3 to 6 months after the initial training.

For evaluation: There must be a process that LMEP now uses to collect data and keep track of procedures done. If the doctors note the scores on the CAGE in the history, then a Clinical Records person could compile those scores.

In continuing with our plan, Karen will talk with the Keim/Sayers/Dresbach office about an orientation meeting, probably over lunch.

Bob will talk to Lincoln Internal Medicine this week.

We could work with Jerome Barry to see if he could get us lined up with an earlier date for video taping at BryanLGH or contact Joan Anderson at LCMS about making a video with her.

Bob will do a literature review of the research indicating that SBI's are effective so that we can incorporate that information more thoroughly into our presentation.

P. S

Information received after the meeting indicated that the following site would be sending out a free email news summary about progress in SBIR's.

<http://www.alcoholandhealth.org>

There is also a phone conference on SBI's June 2 at Noon our time. Information is in separate attachment
